Dear Parents,

We trust that you are safe and healthy at home. We are excited to share with you a newly planned activities for our little students.

As you may know, April 23rd marks the holiday of national sovereignty and children's day. Therefore, we decided to include an activity, which consists of the children of the world, their clothes, favorite dishes, and the games played around the world. We added a little bit of geography. While we included explanations about how you should play the games, we also added QR codes for YouTube videos.

We continue diligently to do our best these current circumstances and we hope to meet your expectations. Thank you!

DCA Foreigner English Department

It's Story Time

Name of the story: 23 April National Sovereignty and Children's Day in Turkey

Dear Parents,

Please read the story to your child. Once you have finished sharing the story, ask your child to summarize the story in their own words. Did they enjoy the story?

What day is today?

Today is National Sovereignty and Children's Day.

Children all around the world have been celebrating this day since 1979.

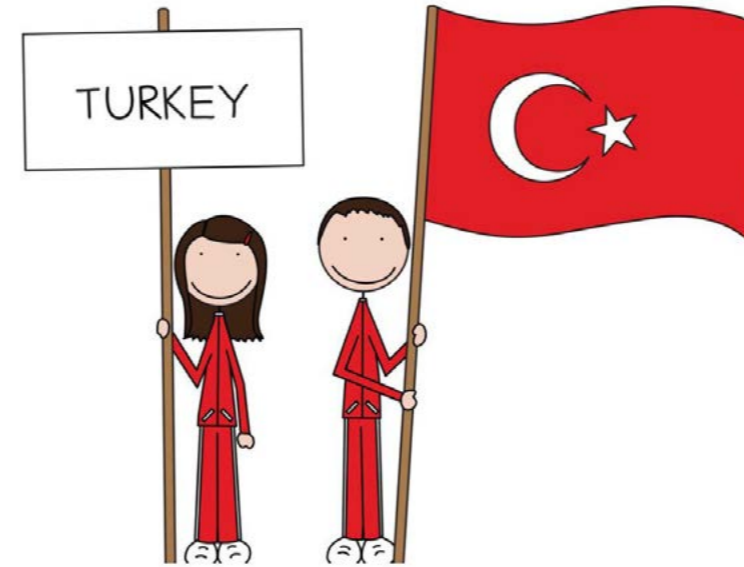

Do you know this man?

This man is the founder of the Turkish Republic, Mustafa Kemal Atatürk. He was awarded the 23rd of April to the children of Turkey because he believed that children are the future of the nation.

How are Turkish people celebrating this day?

Turkish Radio and Television Company bring children from different countries around the world to Turkey. These children stay with Turkish families for a week and participate in children's festivals.

During the festival, children do their national dances, they have a parade and carry their flags, but one of the most interesting activities of this day is they're playing roles of government officials.

At the end:

They visit important places in the Ankara.

What flag comes next?

Dear Parents,
Please ask your child to describe what they
See in the picture in their own words.

How Many?
Count the number of each children.

How to Make Rock Candy with Kids

All you need:

- Water
- Sugar
- Clothespin
- Pot
- Wooden sticks

Step 1: Bring two cups of water to a boil in a large pot on the stove. Next, stir in four cups of sugar. Boil and continue stirring until sugar appears dissolved. This creates a supersaturated sugar solution. This is also the time to add in any flavor enhancements, such as vanilla or peppermint and so on. Allow the solution to cool for 15-20 minutes.

Step 2: While waiting for the solution to cool, prepare your wooden sticks for growing the rock crystals. Wet the wooden sticks and roll them around in granulated sugar. Make sure you allow the sugared sticks to completely dry before continuing to Step 4. You'll need one stick per jar.

Step 3: Once the sugar solution is cool, add in food coloring to create rock candy of your preferred color. Leave this step out for clear-colored crystals.

Step 4: Pour the cooled solution into a glass jar (or jars) and insert the sugar-covered wooden stick into the center of the glass. Make sure that the stick is not touching any part of the jar. If it does, the candy crystals could get stuck to the bottom or to the sides. You can divide the sugar solution across several smaller jars or use one large Mason jar, depending on how many sticks of rock candy you'd like to make. Once in place, secure the stick in place using a clothespin. Cover the top of the glass with a paper towel. You may have to poke a hole in the paper towel for the wooden stick to poke through.

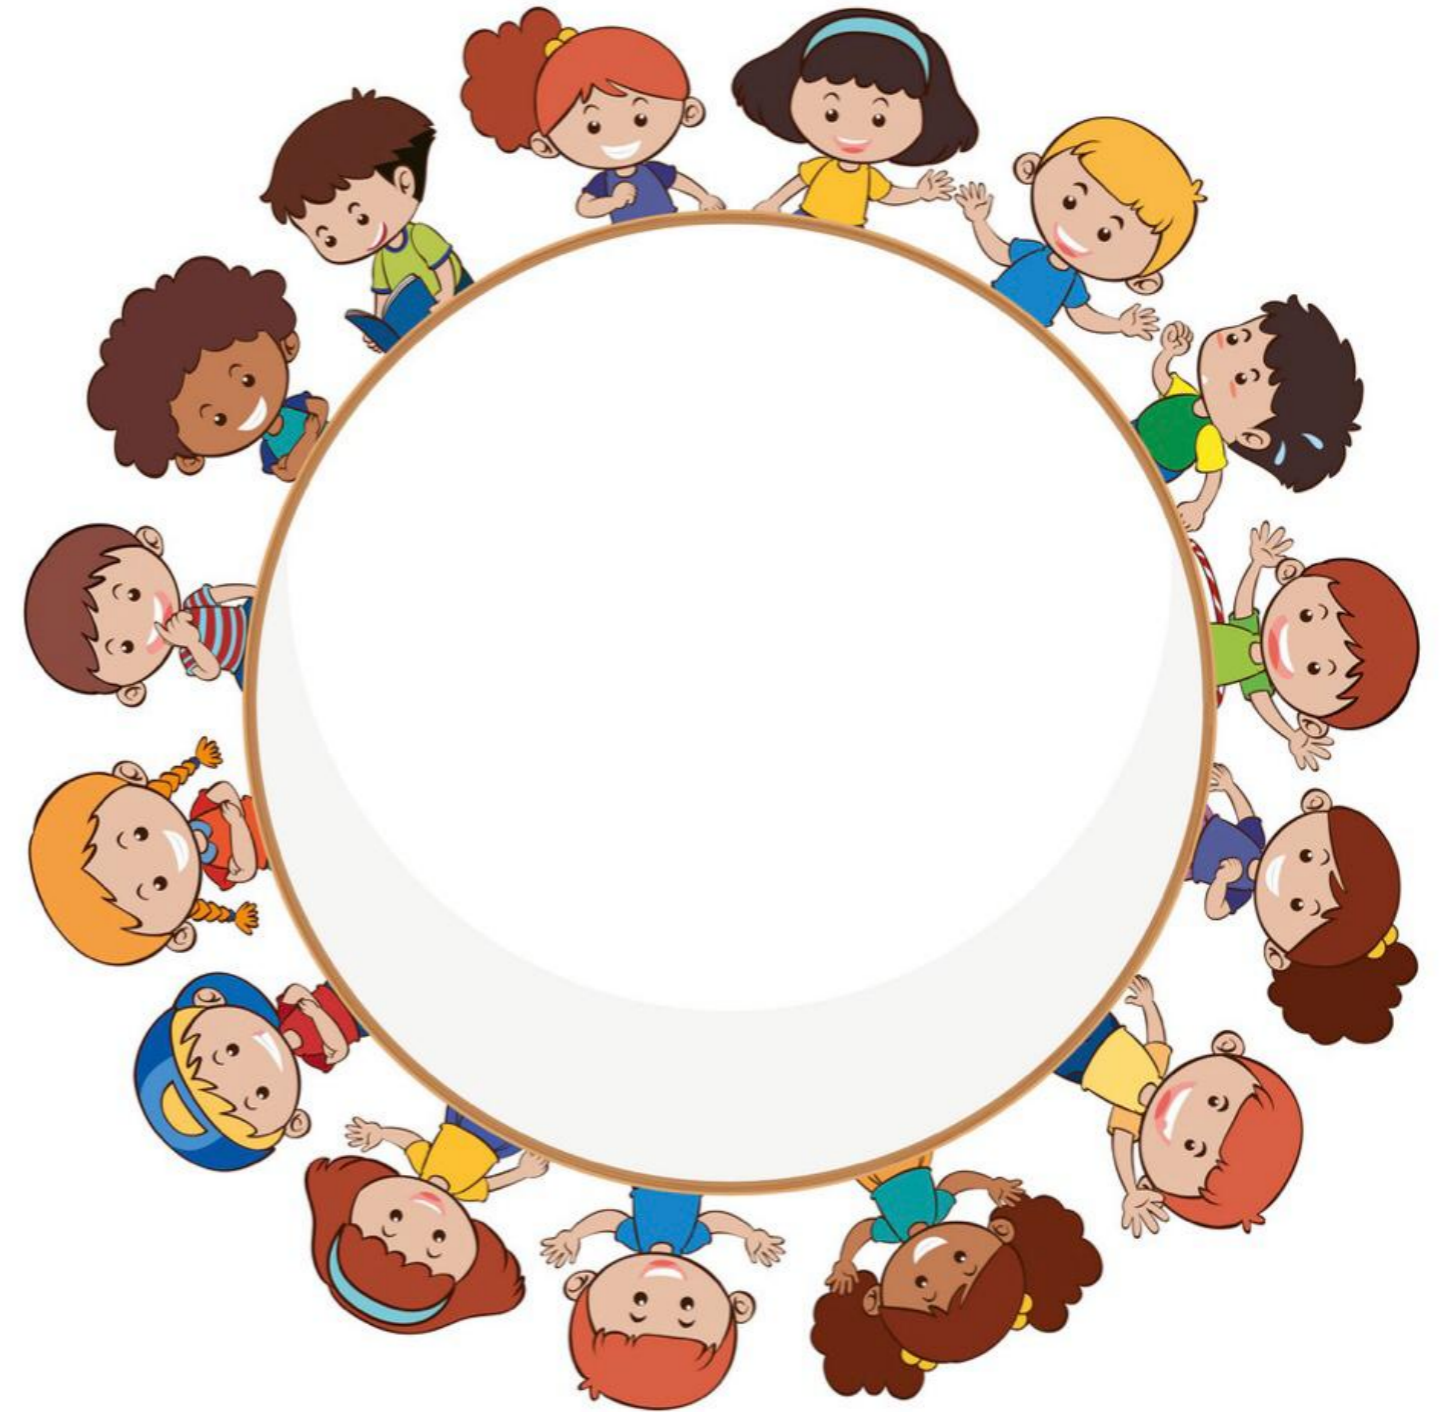

Step 5: How to Make Rock Candy

Place the glass in a cool and quiet place. Loud noises and a lot of movement can disturb the crystal making process. Every day, the candy crystals will grow larger. They will reach their maximum growth potential by two weeks. When you have a good amount of rock candy crystals, remove the stick and place it on a sheet of wax paper to dry...before eating! Our rock candy took at least two weeks to grow, and fyi, it turned out more pink than red!
