Dear Parents,

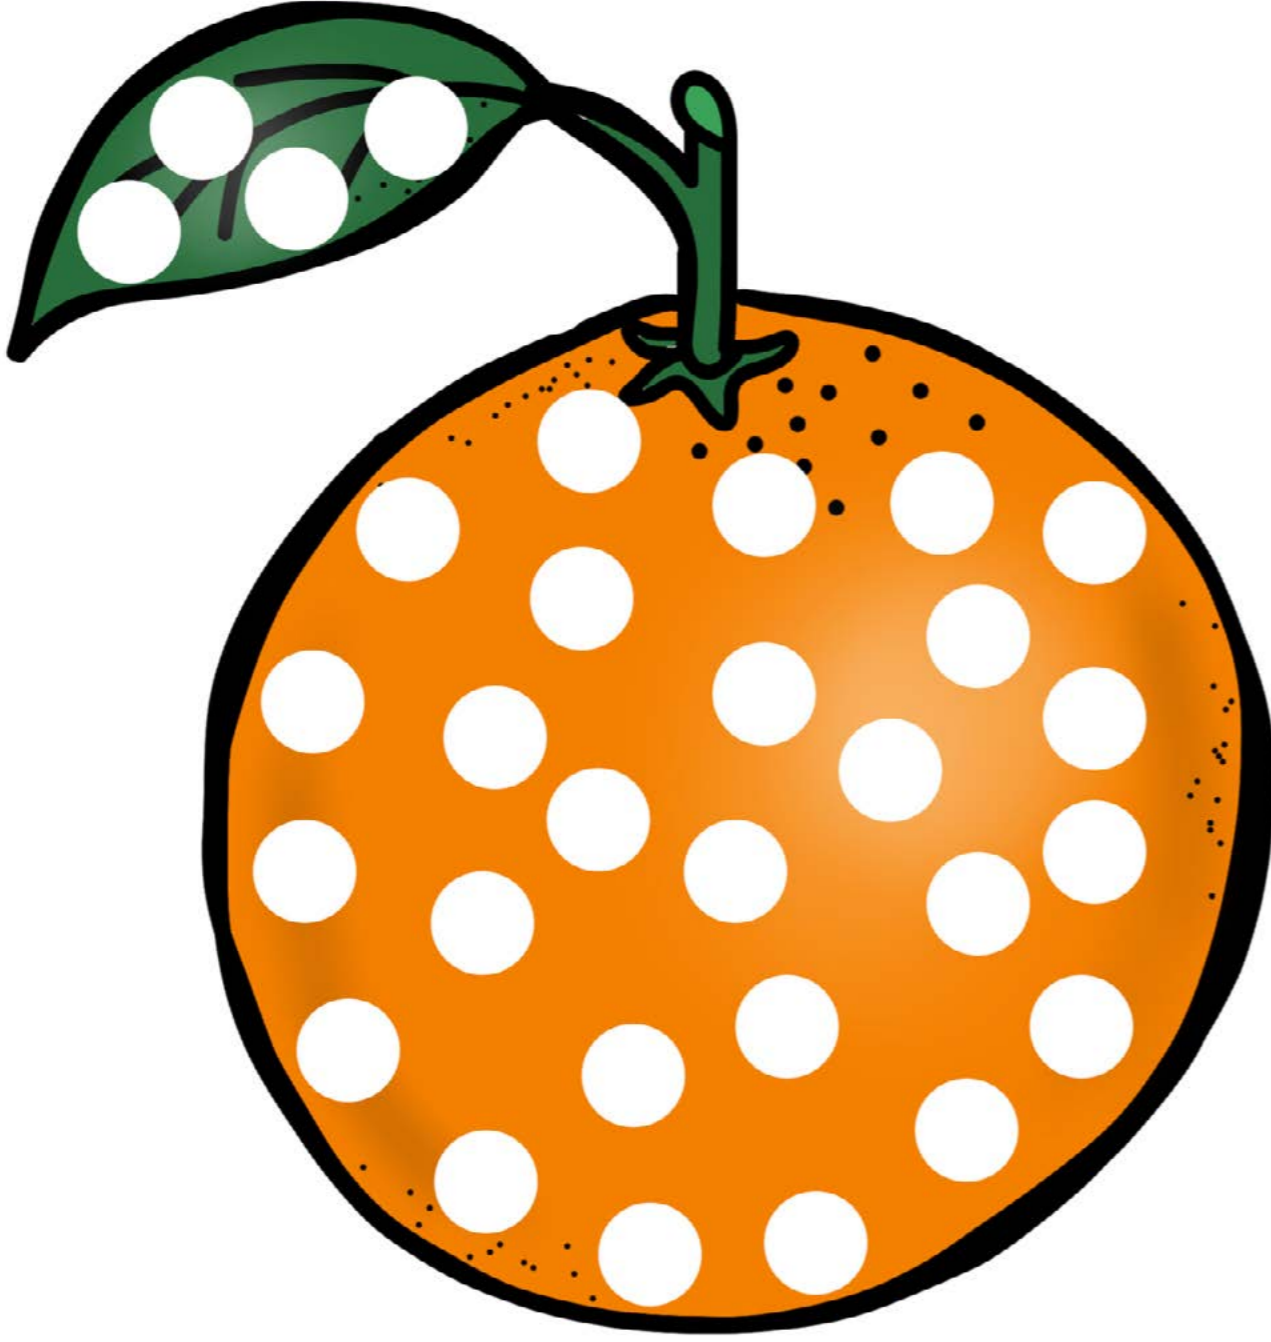

We are proceeding further in completing booklets for our students efficiently. This is our third booklet and we believe we will do better together, thanks to the feedback from you. Our students and you are our greatest motivation. Thank you for your support at all times.

Each study in the booklet was compiled in accordance with the developmental levels of our students. Cutting-glueing activities, scissors use techniques, grouping the objects, pattern formation, painting and many more are included in this booklet. Since we think that it will be difficult to reach the links for the songs and videos through the page, you can now easily access them by reading them on your mobile phone with QR code.

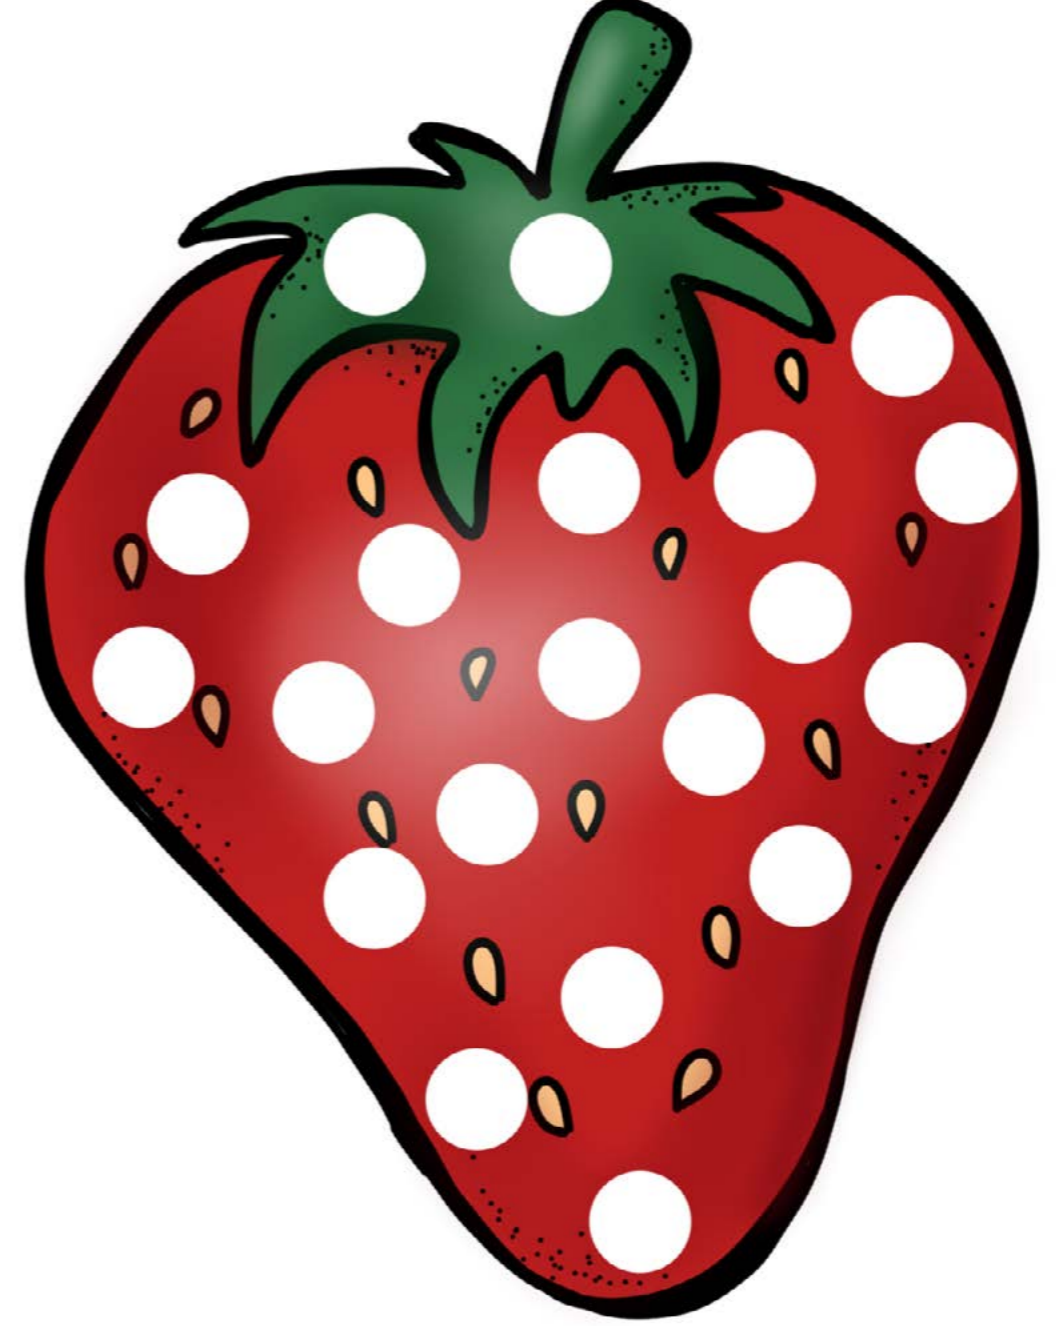

This week topic will be about vegetables and fruits vegetables and fruits. We wish you healthy days with plenty of vitamin. As we always say “healthy mind is in a good body”

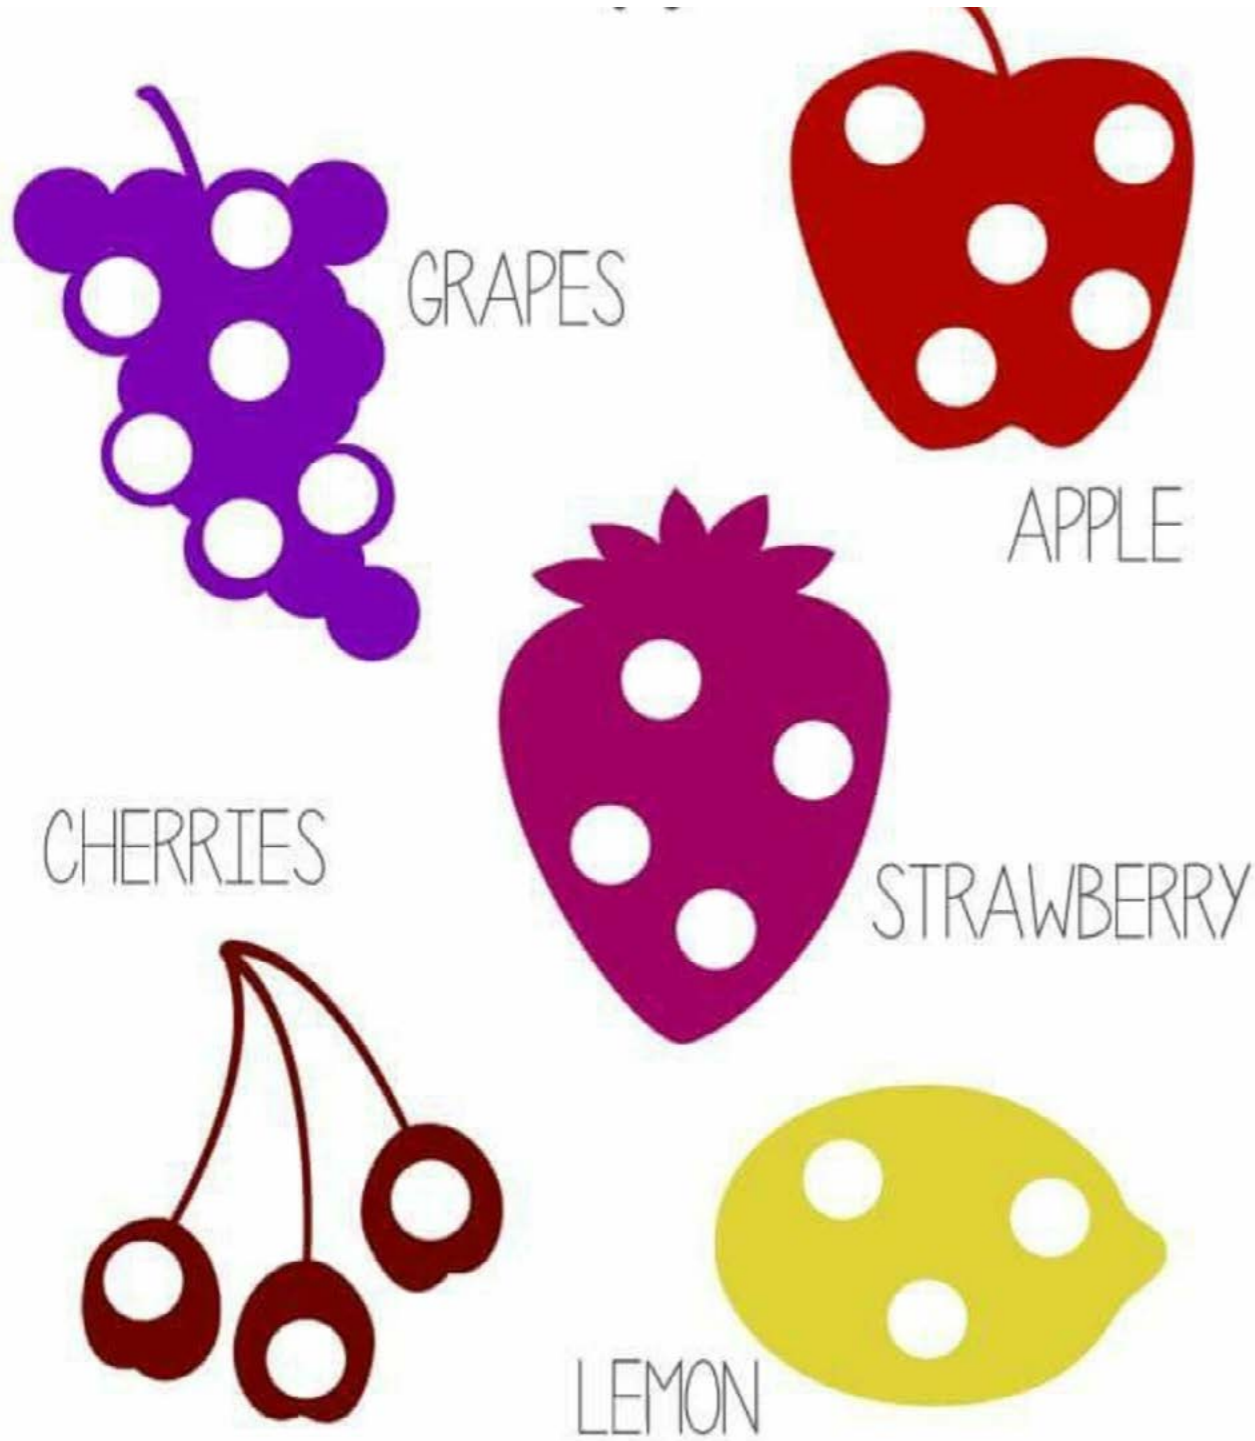

DCA Foreigner Language Department

Orange

Strawberry

### 1. The Taste Test Set Up

Begin the lesson by showing the students the whole apples. It can be quite helpful to have the slices pre-cut, especially if you have a very active group of learners. In our picture, we used Mr. Potato Head to help invite the students to explore. You can discuss the sense of taste, classify the apples by color, count the apples, count the children and figure out how many pieces you need. Be sure to use expanded vocabulary words to describe the apples. Some great word examples include:

juicy/drippy/wet

crunchy/hard/loud/crisp

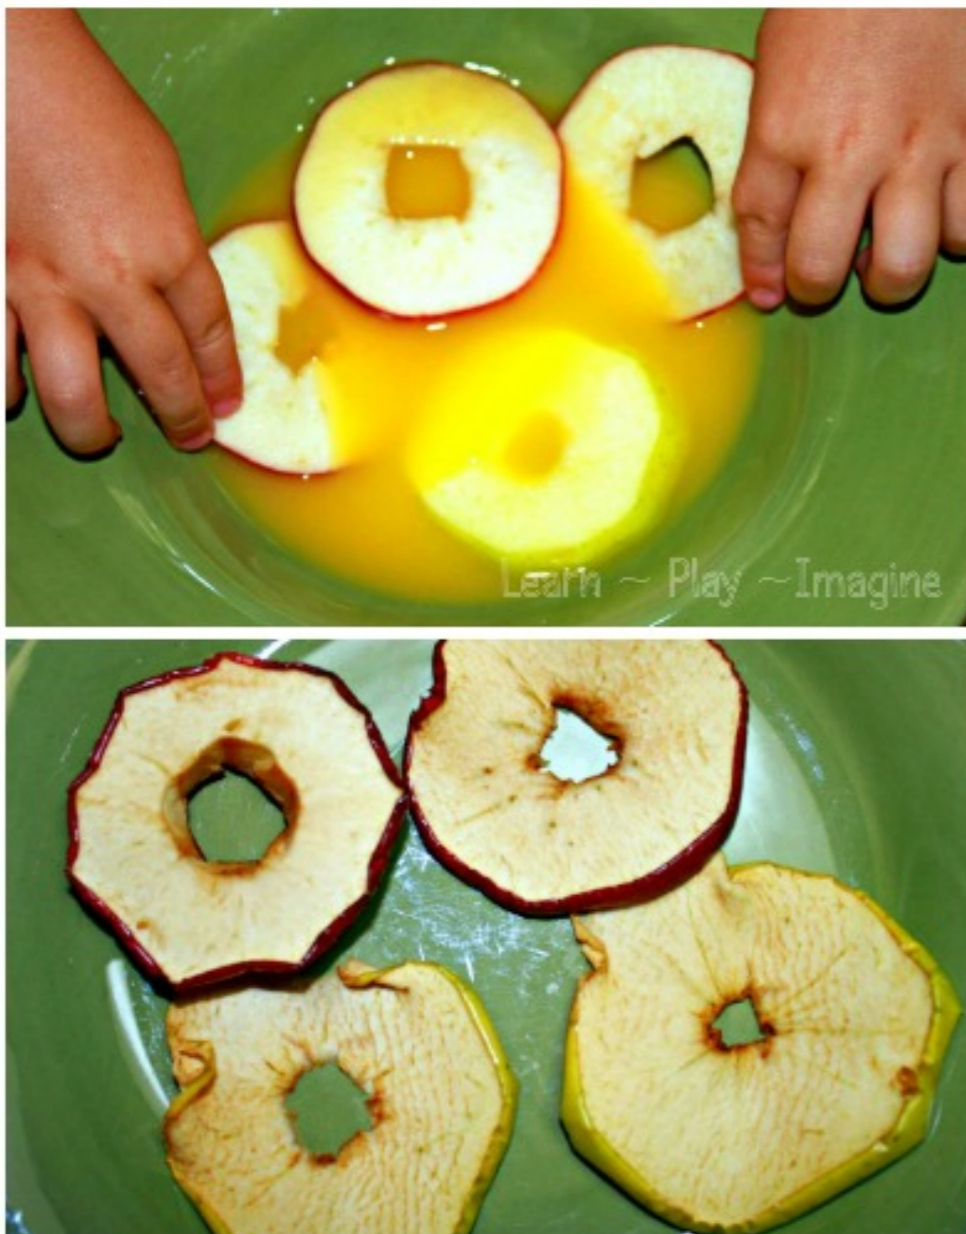

shiny/dull/bright/dark

mushy/soft

sour/sweet/bitter/tangy

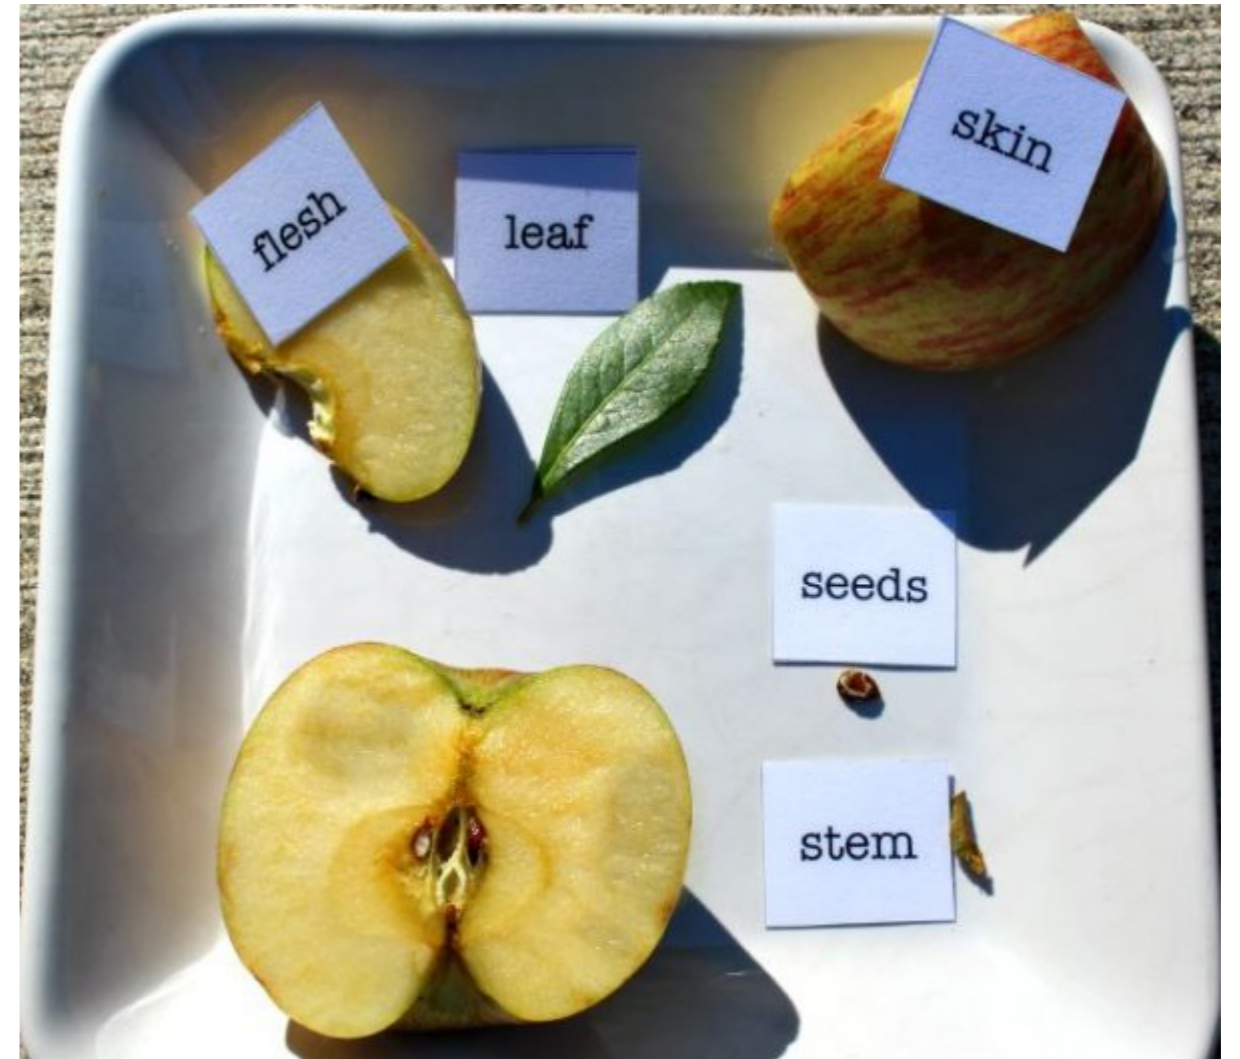

## 2. apple slices experiment

Do a science experiment with sliced apples . dip one group of apple slices in orange juice and leave the other group untouched. check on our apples several times throughout the day and you can observe as the undipped apples get brown and shrivel. The dipped apples remained fairly unchanged.

## 3. Dissect an apple

A great science exploration and a lesson for kids. Dissect an apple and let them check out all of the parts

## Fine motor

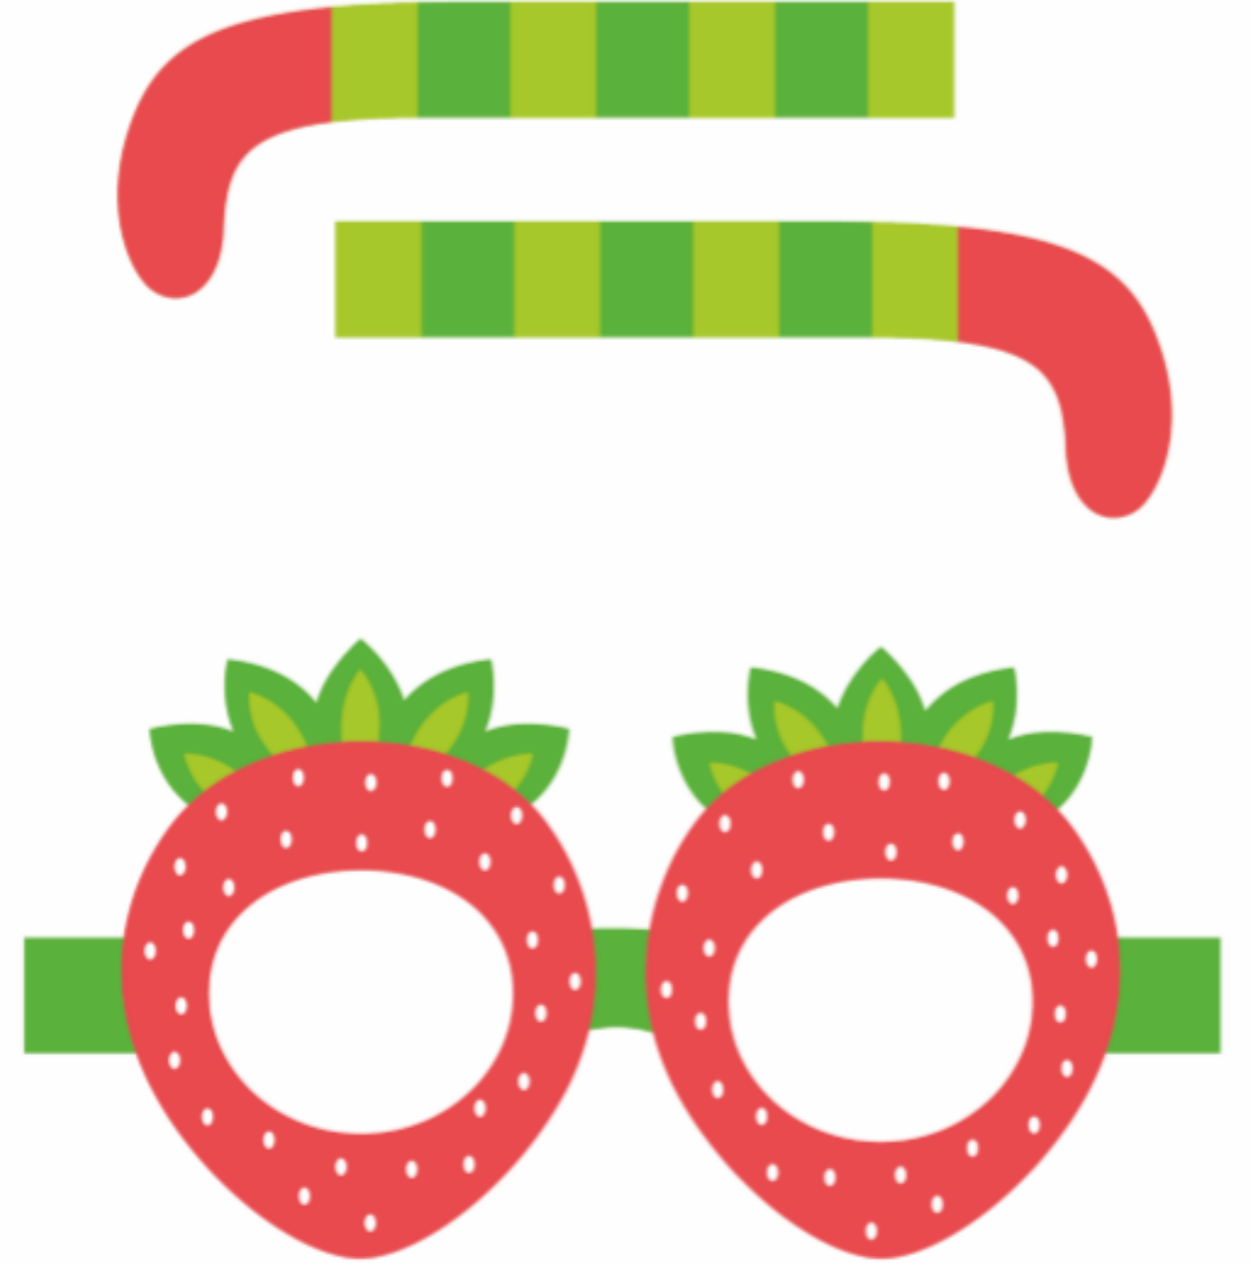

### 1 . Watermelon Potato Prints

Simply take some small potatoes and cut them in quarters. Paint them like a watermelon and stamp away!

### 2 . Summer Fruit Glasses

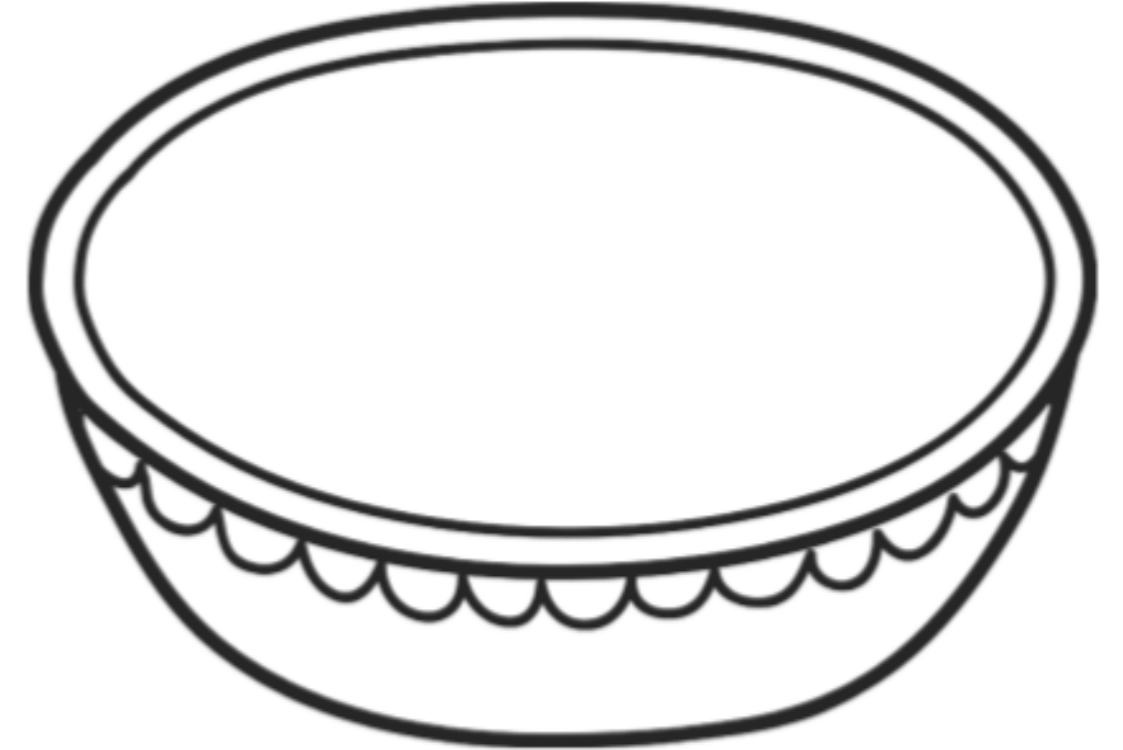

Cut all the parts with scissors, glued the arms and added yellow transparency film for lenses (cellophane would work too)

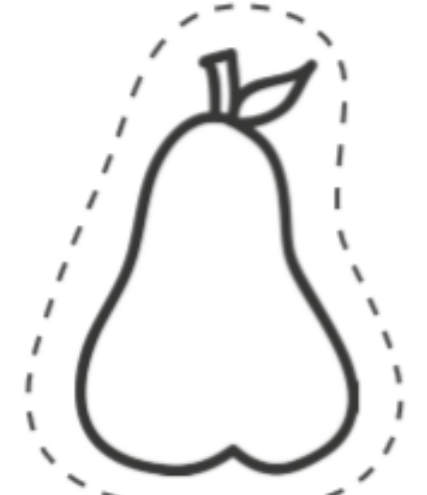

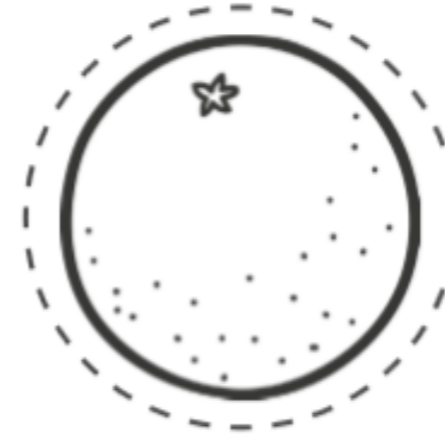

#### 4. fill your fruit bowl

Children colour and cut out their chosen fruits and stick them in the bowl.

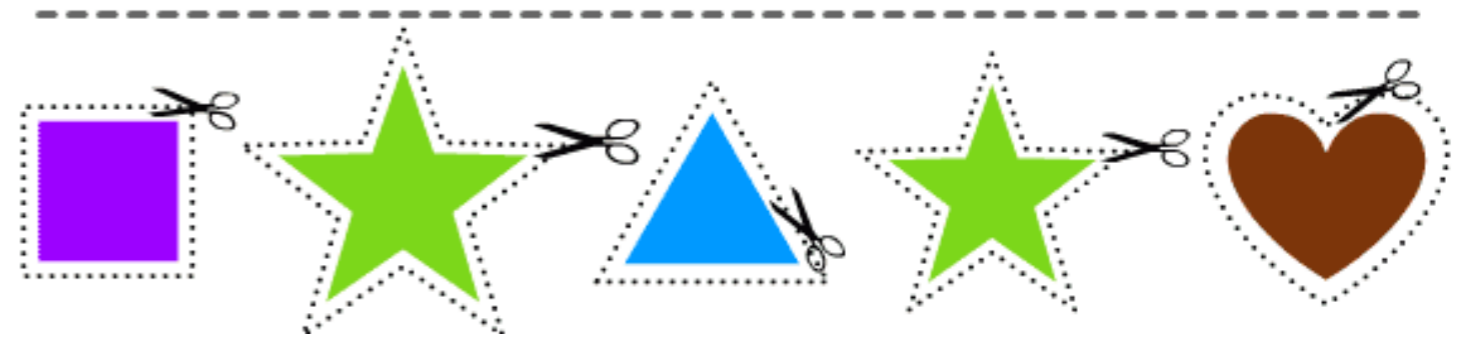

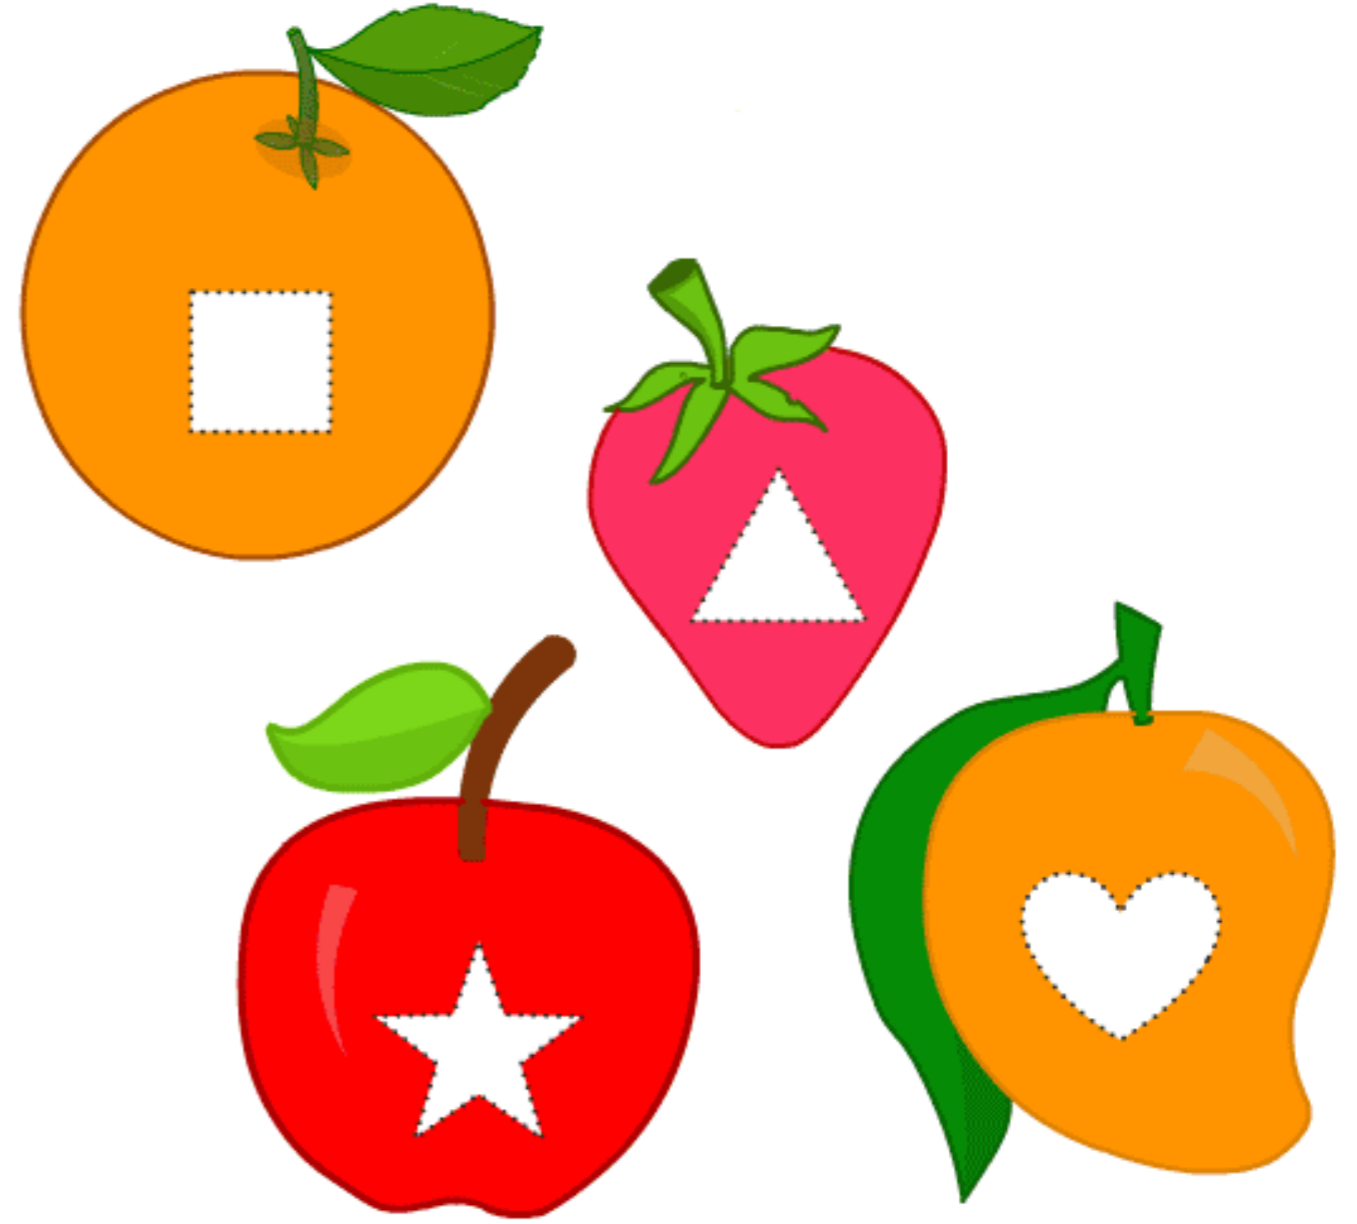

## Fill your fruit bowl!

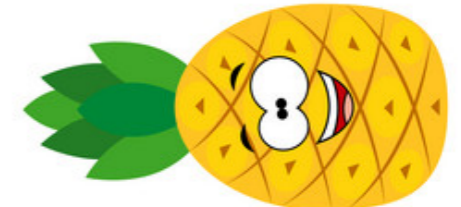

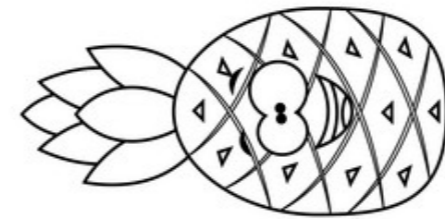

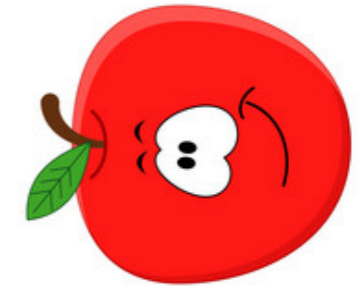

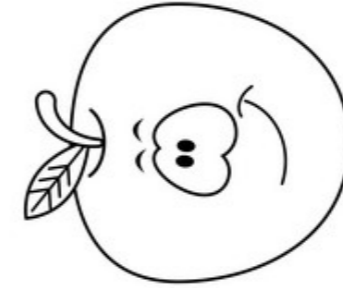

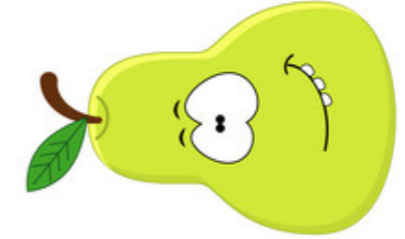

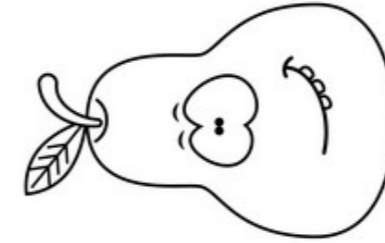

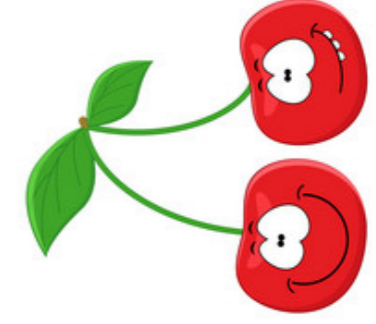

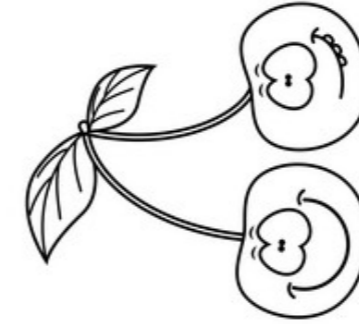

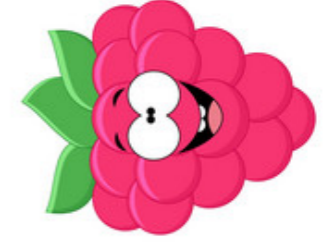

5. cut and paste the shapes on the correct places

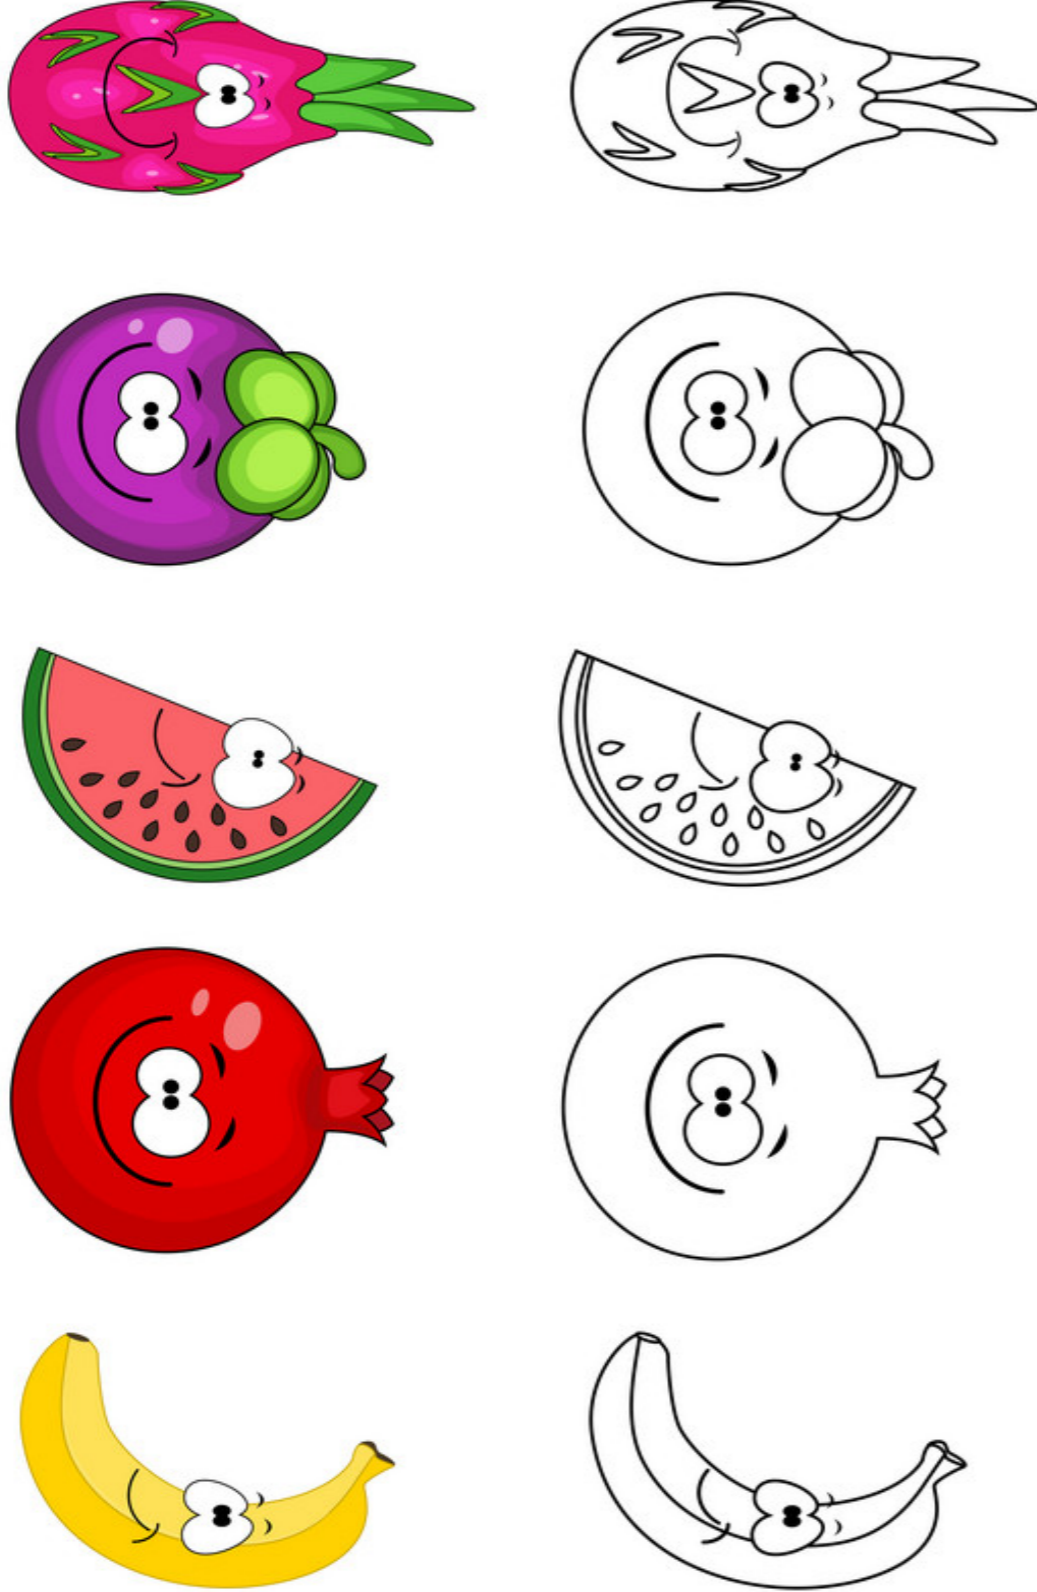

## Coloring

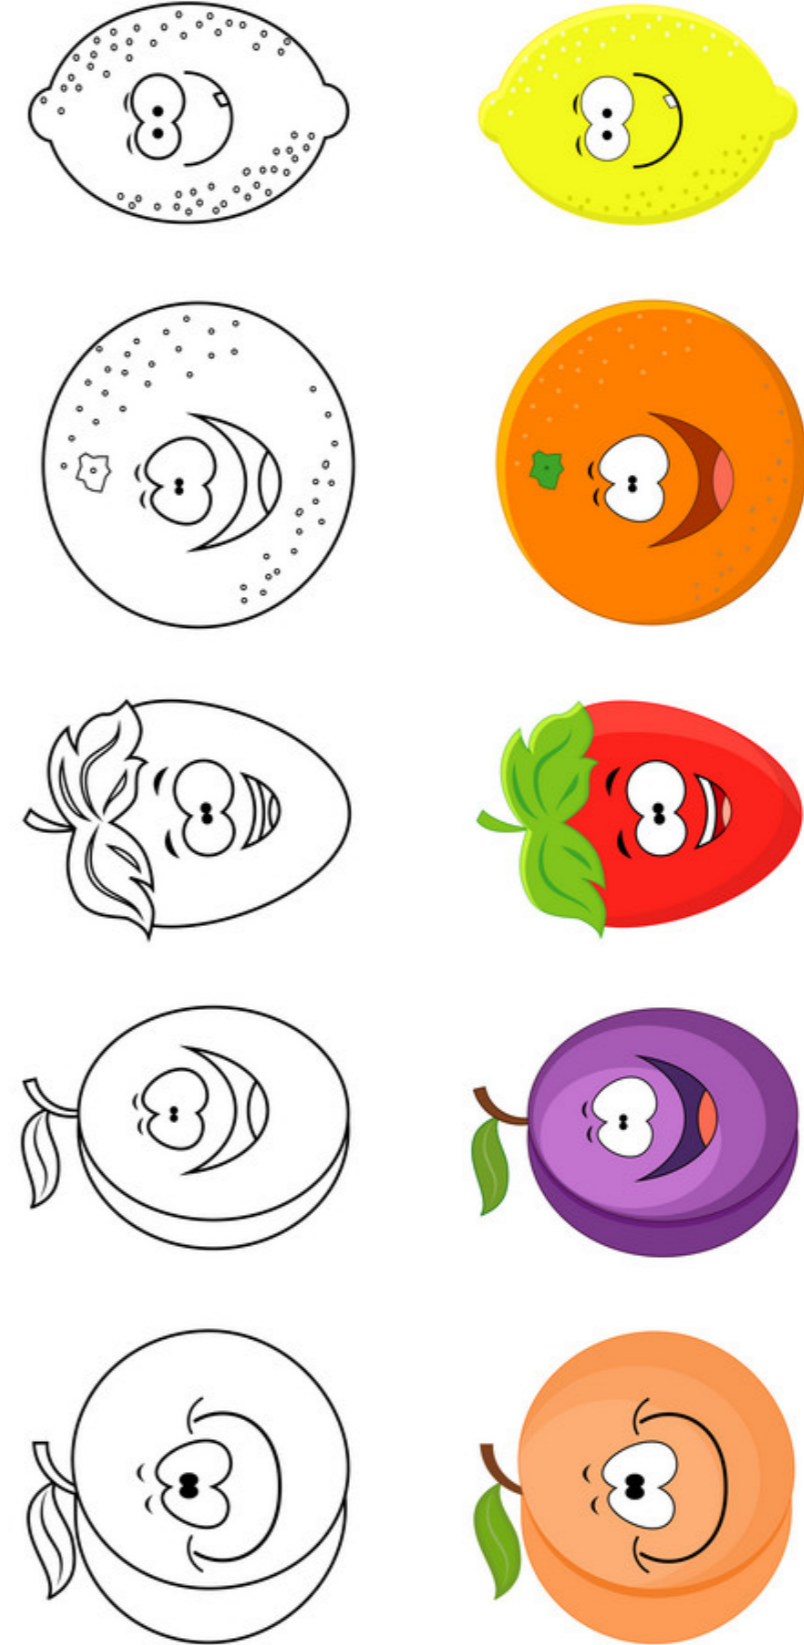

1.

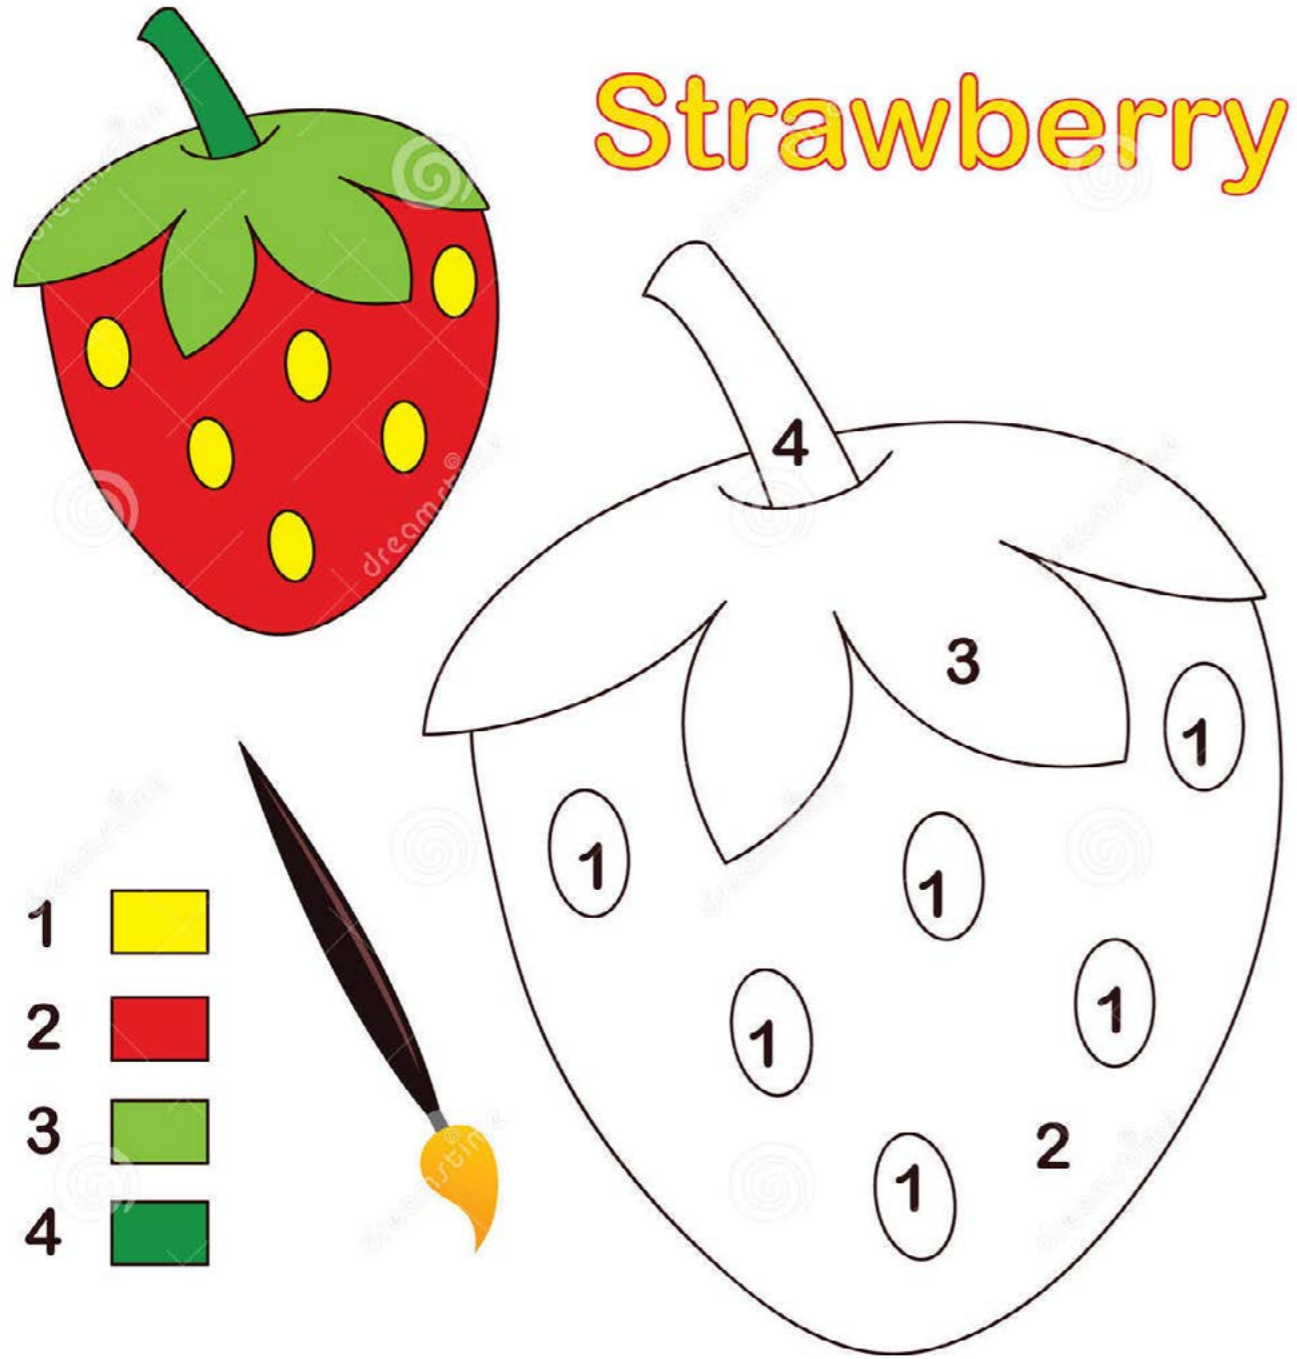

2 .

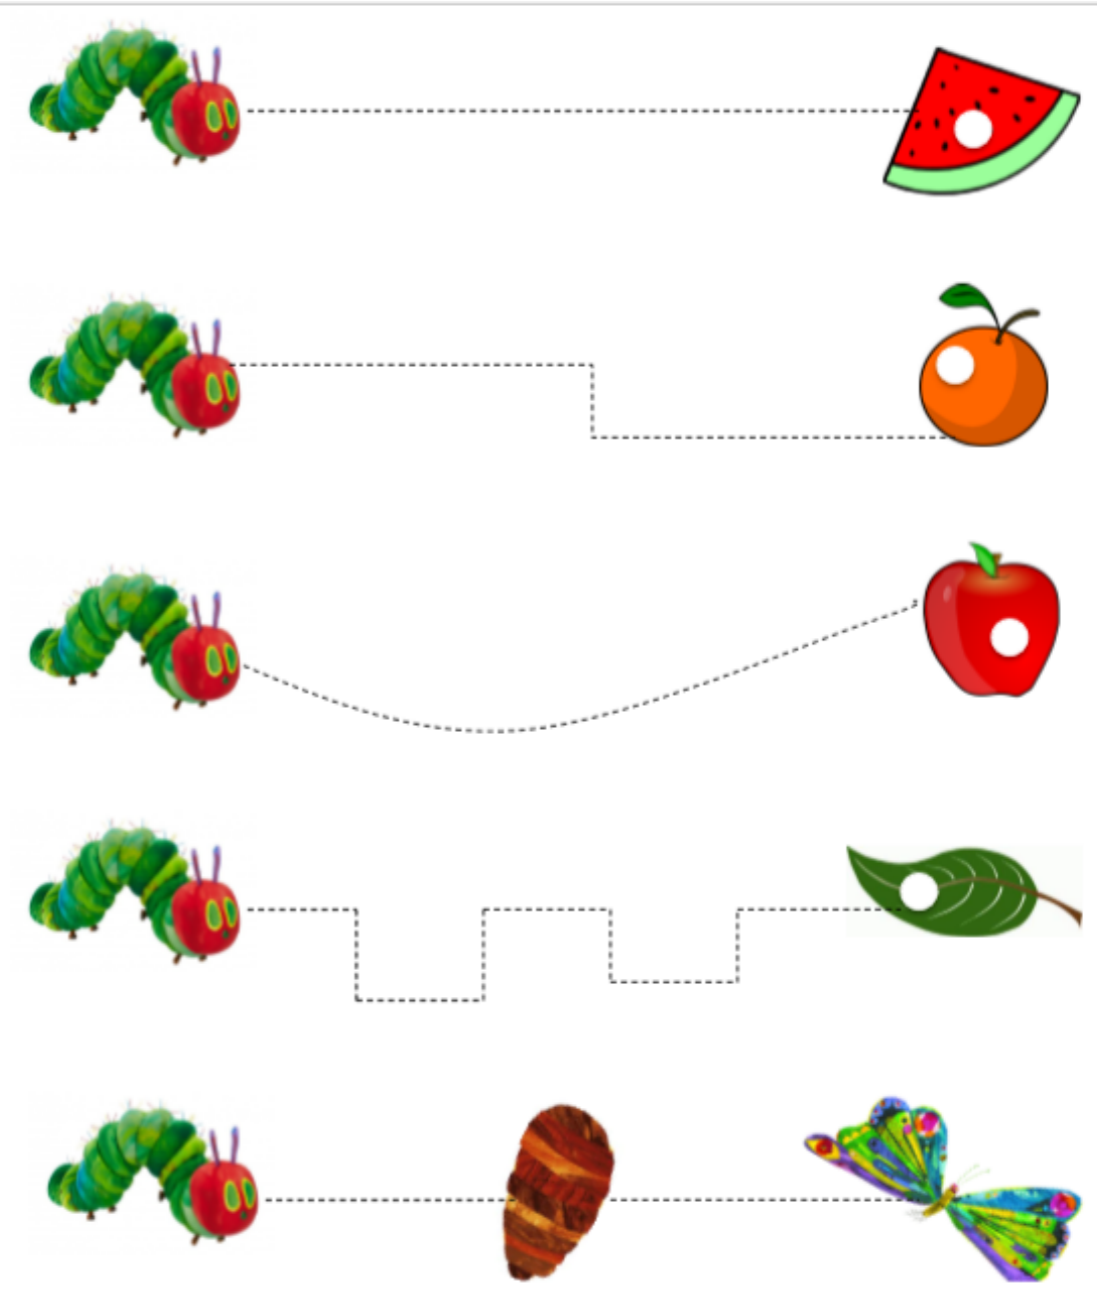

3 .

### Pre writing and matching

1. CAN YOU HELP THE CATERPILLAR GET SOME FOOD so it can grow into a beautiful butterfly

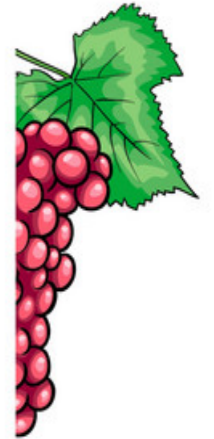

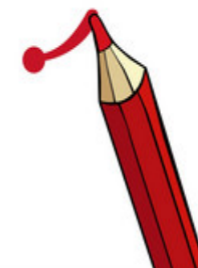

2 .

## Picture Matching

Draw a line from fruit on the left to the matching fruit on the right.

3 .

4 . Circle all the picture that are fruites

Vocabulary

- Apple
- Orange
- Watermelon
- Banana
- Kiwi
- Pineapple
- Strawberry
- Chery
- Mango
- Grapes
- Lemon
- Peach
- Plum
- Pear
